Tsunami Information Statement, National Tsunami Warning Center

On 01/21/17 at 2030 hours, a 8.0 magnitude earthquake occurred at a depth of 104 miles near the Solomon Islands in the Pacific Ocean. A Tsunami Information Statement was issued by the National Tsunami Warning Center stating that due to the depth of the earthquake a tsunami was not expected to impacted the California coast. The California State Warning Center performed a coastal county roll call to brief the counties there was no tsunami danger. Notifications were made per SOP.

Cal OES Southern Region

- Numerous sources have revealed multiple protests are expected to occur throughout Downtown Los Angeles, through Sunday, 01/22/17.
- Intelligence sources estimate approximately 150,000 people will be demonstrating over the course of the four day period in the Downtown area. While this area falls under the jurisdiction of the Los Angeles Police Department (LAPD), the Los Angeles County Sheriff's Department (LASD) is responsible for providing policing services for several key structures in that area.
- Law enforcement services for these county buildings will be under the jurisdiction of the Los Angeles County Sheriff's Department with building protection to be provided by LASD personnel. Exterior streets and sidewalks will remain under the jurisdiction of the Los Angeles Police Department (LAPD).
- The Emergency Operations Bureau has met with all involved County Bureaus and the LAPD to coordinate all resources used for both the protection of county structures and possible mutual aid request from Operational Area partners.
- There are a number of other local protests across the state scheduled all weekend.
- Law enforcement and emergency management are monitoring closely.

WEATHER OF CONCERN

Weather of Concern

- The next system impacts the State tonight into Sunday. Hazardous mountain travel likely with chain controls, delays, accidents, and white-out conditions at times. Gusty winds will accompany the storm with the likelihood of additional power outages and wind damage. Localized flooding possible near streams and poorly drained urban areas. Dry period after Tuesday through at least the end of next week.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

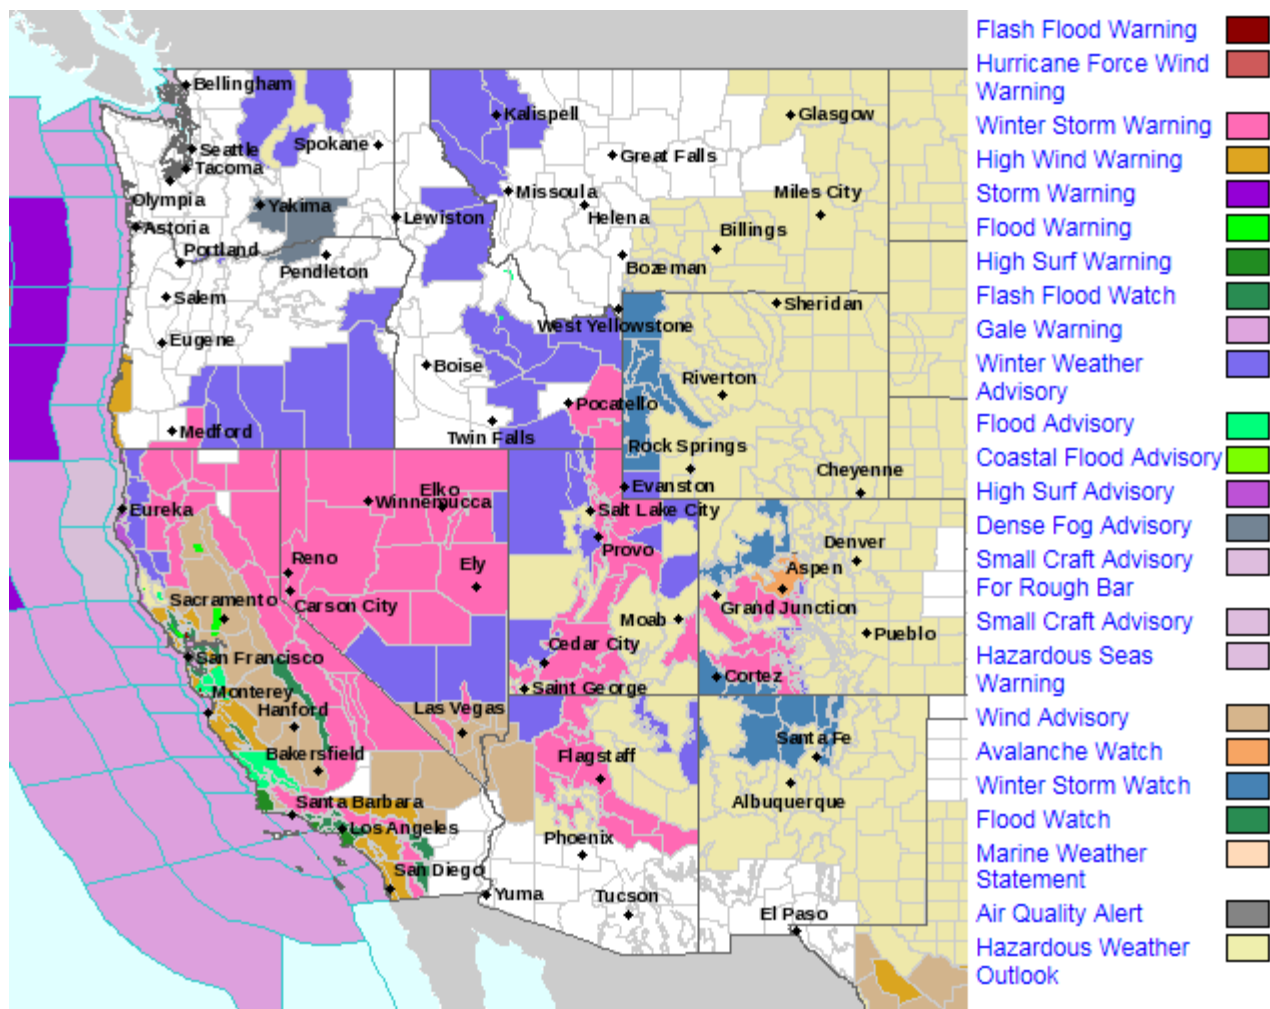

NORTHERN CALIFORNIA

Cool, wet, unstable conditions behind the front will lead to numerous showers in the mountains and scattered showers in the valleys today. Isolated thunderstorms are also possible just about anywhere in the region as well. The next storm will arrive early Sunday with southerly gusts to 40-60 mph and snow levels near 4000-6000 ft. in heavy precipitations. Snow levels will drop Sunday afternoon to 2500-4000 ft. once the front moves through. Scattered showers will continue later Sunday through early Tuesday in the colder air mass behind the front. The problem of soft, saturated soils will continue to make downed trees possible. Area water courses will again run rather high as well. At this time it looks like a stretch of mild and dry weather with occasional offshore winds will begin by late Tuesday and last into early February.

SOUTHERN CALIFORNIA

After a break in the rainfall today, the third, and strongest, storm will arrive Sunday. Heavy rain will occur along the central coast prior to daybreak with heavy rain reaching Southern California late Sunday morning. Gusty west winds and intense rainfall can be expected for a 3-5 hour period Sunday during the passage of a cold front. Storm total rainfall from the third system may be 2-5" with the heaviest amounts on south and west aspects of Southern California. This rainfall will likely trigger mud and debris flows near recently burned areas. The snow level will rise to 7,000 feet Sunday. The rainfall should taper to showers for Sunday night through Monday. Cool, windy weather will follow Tuesday. Sunny, drier and warmer weather will return beginning next Wednesday.
